PROJECTS

EMI Calculator

React JS , JavaScript ,Media Query

The EMI Calculator project in React and JavaScript helps users calculate their Equated Monthly Installments (EMI) for loans based on principal amount, interest rate, and tenure. It dynamically updates the results as users input values, providing a seamless and interactive experience.

Counter App

React js , Media Query

A Counter App is a simple application that allows users to increment, decrement, and reset a numerical value. It typically features buttons for increasing and decreasing the count, along with a reset button to revert to the initial value. The app provides real-time updates to the displayed count.

Task Manager

React.js , CSS , Firebase

A Task Manager Project is a web application designed to help users efficiently organize and manage their tasks. It typically includes functionalities for creating, updating, and deleting tasks, categorizing them by priority or status, and setting deadlines. The project enhances productivity by providing a user-friendly interface to track progress and prioritize responsibilities.

Money Manager

React.js , CSS

The Money Manager is a user-friendly web application designed to help users manage their finances effectively. It allows users to credit and debit money, view the available balance in real-time, and track expenses with detailed reasons and amounts listed in an organized table. This project aims to provide a clear and interactive platform for budgeting and expense management.
